```
C:\Users\HP>color help  
Sets the default console foreground and background colors.
```

COLOR [attr]

attr Specifies color attribute of console output

Color attributes are specified by TWO hex digits -- the first corresponds to the background; the second the foreground. Each digit can be any of the following values:

0 = Black	8 = Gray
1 = Blue	9 = Light Blue
2 = Green	A = Light Green
3 = Aqua	B = Light Aqua
4 = Red	C = Light Red
5 = Purple	D = Light Purple
6 = Yellow	E = Light Yellow
7 = White	F = Bright White

If no argument is given, this command restores the color to what it was when CMD.EXE started. This value either comes from the current console window, the /T command line switch or from the DefaultColor registry value.

The COLOR command sets ERRORLEVEL to 1 if an attempt is made to execute the COLOR command with a foreground and background color that are the same.

Example: "COLOR fc" produces light red on bright white

```
C:\Users\HP>color 4
```

```
C:\Users\HP>color 6
```

```

```
C:\Users\HP>CACLS
```

```
NOTE: Cacls is now deprecated, please use Icacls.
```

```
Displays or modifies access control lists (ACLs) of files
```

```
CACLS filename [/T] [/M] [/L] [/S[:SDDL]] [/E] [/C] [/G user:perm]
    [/R user [...]] [/P user:perm [...]] [/D user [...]]
filename      Displays ACLs.
/T            Changes ACLs of specified files in
              the current directory and all subdirectories.
/L            Work on the Symbolic Link itself versus the target
/M            Changes ACLs of volumes mounted to a directory
/S            Displays the SDDL string for the DACL.
/S:SDDL      Replaces the ACLs with those specified in the SDDL string
              (not valid with /E, /G, /R, /P, or /D).
/E            Edit ACL instead of replacing it.
/C            Continue on access denied errors.
/G user:perm Grant specified user access rights.
              Perm can be: R  Read
                            W  Write
                            C  Change (write)
                            F  Full control
/R user       Revoke specified user's access rights (only valid with /E).
/P user:perm Replace specified user's access rights.
              Perm can be: N  None
                            R  Read
                            W  Write
                            C  Change (write)
                            F  Full control
/D user       Deny specified user access.
Wildcards can be used to specify more than one file in a command.
You can specify more than one user in a command.

C:\Users\HP>help
For more information on a specific command, type HELP command-name
ASSOC      Displays or modifies file extension associations.
ATTRIB     Displays or changes file attributes.
BREAK      Sets or clears extended CTRL+C checking.
BCDEDIT    Sets properties in boot database to control boot loading.
CACLS      Displays or modifies access control lists (ACLs) of files.
CALL       Calls one batch program from another.
CD         Displays the name of or changes the current directory.
CHCP      Displays or sets the active code page number.
CHDIR     Displays the name of or changes the current directory.
CHKDSK    Checks a disk and displays a status report.
CHKNTFS   Displays or modifies the checking of disk at boot time.
CLS        Clears the screen.
CMD        Starts a new instance of the Windows command interpreter.
COLOR      Sets the default console foreground and background colors.
COMP       Compares the contents of two files or sets of files.
COMPACT    Displays or alters the compression of files on NTFS partitions.
CONVERT   Converts FAT volumes to NTFS. You cannot convert the
          current drive.
COPY       Copies one or more files to another location.
DATE      Displays or sets the date.
DEL        Deletes one or more files.
DIR        Displays a list of files and subdirectories in a directory.
DISKPART   Displays or configures Disk Partition properties.
DOSKEY    Edits command lines, recalls Windows commands, and
          creates macros.
DRIVERQUERY Displays current device driver status and properties.
ECHO       Displays messages, or turns command echoing on or off.
ENDLOCAL   Ends localization of environment changes in a batch file.
ERASE     Deletes one or more files.
EXIT      Quits the CMD.EXE program (command interpreter).
FC         Compares two files or sets of files, and displays the
          differences between them.
FIND      Searches for a text string in a file or files.
FINDSTR   Searches for strings in files.
FOR       Runs a specified command for each file in a set of files.
FORMAT   Formats a disk for use with Windows.
